

LOGISTICS CLUSTER – Cargo Prioritization and Scheduling Overview

Requesting Organisations submit their CMRs to WFP's Logistics Cluster Cell

LCC checks the validity of the CMR:
 - CMR is properly filled
 - Request is valid
 (location not accessible by road / emergency service)

Prioritization Cell establishes priorities in terms of areas to serve and goods needed Updated minimum every 72 hours

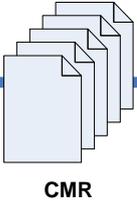

List of updated priorities

CMR is checked against established priorities in regards of location and nature of the goods

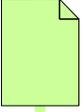

Mission Scheduling Cell meets daily at 10:00 am, allocates assets to deliver goods and prepares flight scheduling

UNHAS Ops Team designs a proposed number of sorties to fulfil the prioritised requests. Proposal is submitted to the Mission Scheduling Cell.

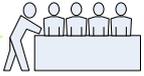

CMR

A consolidated list of prioritized requests is provided to UNHAS Ops Team.

Flight Scheduling provided to UNHAS & LCC

The LCC notifies requesting party about planning and calls the cargo forward Ad Hoc Transportation provided to deliver goods in Vilamor Air Base

LCC:
 The Logistics Cluster Cell, managed by WFP and composed of staff of IASC Organisations, provides support to the GOP response. The LCC administers the cargo booking process and feeds information to the Prioritisation and Mission Planning Cells.

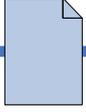

UNHAS / Service Providers receive flight schedules and perform missions. Caveat: The Air Carrier Capt. has final decision on feasibility of requested mission(s).

Prioritization Cell: The Prioritization Cell is jointly chaired by the NDCC and the Office of the Resident Coordinator. The Cell is also comprised of representatives of the DSWD. The Prioritisation Cell will designate priorities in terms of areas to serve and relief goods needed.

Airlift organized

The LCC provides daily reports and tracking of goods in the pipeline to NDCC / DSWD and IASC

Mission Scheduling Cell: The Scheduling Cell is jointly chaired by the NDCC and UNHAS. Representatives of the Philippines Air-Force will provide liaison to address operational bottlenecks. The Cell will produce the schedule to fulfil the requested missions.

Drop Off Point

Goods are being distributed to population in need
