SITUATION REPORT
Gaza Floods Emergency, Mozambique
11 February 2012

Contents:
1. SITUATION UPDATE
2. LOGISTICS COORDINATION
3. TRANSPORT SECTOR
4. STORAGE
5. OTHER

SITUATION UPDATE

Infrastructure
- The road accessibility to the affected areas remains volatile and the Logistics Cluster is gathering information on key roads and infrastructure in the affected area. A map of the assessed roads will be shared shortly. All organisations operating in Gaza that have information on the conditions of roads and key infrastructure are encouraged to contact the Logistics Cluster focal point in Maputo.

LOGISTICS COORDINATION
- The next Logistics coordination meeting at Maputo level is scheduled for Tuesday 12 February at 3.30 p.m.

TRANSPORT SECTOR

Air Transport
- The Logistics Cluster helicopter was demobilised on 9 February as no further service requests were received. Air cargo transport is available through the Logistics Cluster until 15 February using INGC contracted helicopters.
- The Logistics Cluster is supporting the INGC’s air operation with fuel.
- In total the helicopter transported some 30mt of humanitarian relief items to the affected population and completed three emergency assessment missions for the food and shelter clusters.

Ground Transport
- Since the start of the operation the Logistics Cluster has dispatched some 180mt of life saving humanitarian aid to the flood affected areas for six unique users and in support of the shelter, food, nutrition, protection and ET clusters.

STORAGE
- The logistics hubs in Chibuto and Chokwe have been closed with the departure of the helicopter. Storages and dispatches are now available in Chiaquelane and Xai-Xai. An additional temporary storage unit has been set up in Chiaquelane to ensure sufficient storage capacity for organisations operating in the affected areas.
- So far in the operation, three clusters have made use of the Logistics Cluster storage services.

OTHER
- N/A
