Logistics Cluster Update

The Logistics Cluster continued to target deliveries to isolated communities over the last week and the helicopters have been flying rotations from both Laoag and San Fernando La Union to Alaoa and Laot Balantay in Abra Province and Cervantes, Quirino and Sugpon in Ilocos Sur Province. Deliveries to Malibcong municipality were complicated by security concerns but flights were able to reach Bangued in Abra Province from where relief items were transhipped and trucked into Malibcong in conjunction with local police.

Air Operations

As anticipated, the Logistics Cluster has concluded its air operations as of 30 November. Since operations began on October 15, two MI-171s have flown 389 rotations (250.17 hours) carrying 2,394 passengers and 410 mt of food and of non-food items for the Logistics Cluster.

Surface Transport

Surface transport to affected areas continues with the final requests for truck movements to be submitted to the Logistics Cluster by the end of the week in anticipation of wrapping up Cluster operations in December. Cargo Movement Request forms are available at www.logcluster.org/phl09a.

Warehousing

The mobile storage hubs in Laoag and at Wallace Airbase in San Fernando La Union are currently being emptied and are likely to be dismantled in the coming week. A third Logistics Cluster hub continues to support surface transport operations out of Baguio.

GIS

The Logistics Cluster will no longer have a dedicated GIS officer in Manila however all Logistics Cluster maps will continue to be available up to A0 size through the WFP office in Manila. As always, maps can also be downloaded from the Logistics Cluster website at www.logcluster.org/phl09a.

The Logistics Cluster unloads food for an orphanage in Subay, Rizal Province, which was severely damaged by Tropical Storm Ketsana ("Ondoy").
