

SRF: INVENTORY & HANDLING UNITS

Indicates the number of items (or "Parts" of a kit) contained in the packages the Logistics Cluster has agreed to assume responsibility for.

Counts the number of things the Logistics Cluster has assumed responsibility for keeping track of.

TRANSPORT UNITS

Indicates if items have been packaged in such a way as to require equipment for load/unload.

INVENTORY UNIT

SMALLEST

"Give to a person"

The lowest level unit for an item: it should be used to measure how many things have been distributed to a single person or household, or what unit reflects the end-use requirements for a given program.

Kilogram, Liter, Each, Pair, Part

HANDLING UNIT

MEDIUM

"Move by Hand"

The middle level unit for an item: it should be used to measure how many things have been loaded onto a vehicle or put into a transit warehouse.

Bags, Bales, Boxes, Crates, Drums, Kits, Rolls, Loose

TRANSPORT UNIT

LARGEST

"Move with equipment"

The top level unit for an item: is not relevant for the purpose of controlling cargo quantities. It may be useful to operations, indicating the best way to manage loading, un-loading (i.e. by crane, forklift, reach stacker, etc.).

Pallets, Air Pallet, Shipping Containers...
