

## SRF: INVENTORY & HANDLING UNITS

*Indicates the number of items (or "Parts" of a kit) contained in the packages the Logistics Cluster has agreed to assume responsibility for.*

### INVENTORY UNIT

#### SMALLEST

*"Give to a person"*

The lowest level unit for an item: it should be used to measure how many things have been distributed to a single person or household, or what unit reflects the end-use requirements for a given program.

**Kilogram, Liter, Each, Pair, Part**

*Counts the number of things the Logistics Cluster has assumed responsibility for keeping track of.*

### HANDLING UNIT

#### MEDIUM

*"Move by Hand"*

The middle level unit for an item: it should be used to measure how many things have been loaded onto a vehicle or put into a transit warehouse.

**Bags, Bales, Boxes, Crates, Drums, Kits, Rolls, Loose**

## TRANSPORT UNITS

*Indicates if items have been packaged in such a way as to require equipment for load/unload.*

### TRANSPORT UNIT

#### LARGEST

*"Move with equipment"*

The top level unit for an item: is not relevant for the purpose of controlling cargo quantities. It may be useful to operations, indicating the best way to manage loading, un-loading (i.e. by crane, forklift, reach stacker, etc.).

**Pallets, Air Pallet, Shipping Containers...**
