Georgina Stickels, World Food Programme

Georgina Stickels has led WFP’s environmental sustainability efforts since 2009, building a small team of environmental professionals to address environmental policy, practical action and reporting. A Chartered Environmentalist, Georgina’s prior experience spans environmental programme management in Australia and the UK, environmental compliance, consultancy and mainstreaming sustainability in corporate communications.

Dr Gyöngyi Kovács, Hanken School of Economics

Gyöngyi Kovács is the Erkko Professor in Humanitarian Logistics and is the Subject Head of Supply Chain Management and Social Responsibility at the Hanken School of Economics, in Helsinki, Finland. She is a founding Editor-in-Chief of the Journal of Humanitarian Logistics and Supply Chain Management (JHLSMC) and is on the editorial board of several other journals. She led the Humanitarian Logistics and Supply Chain Research Institute (HUMLOG Institute), Hanken School of Economics since its establishment in 2008 until 2014. She has published extensively in the areas of humanitarian logistics and sustainable supply chain management.

Martin Guard, UNEP

Martin Guard is an international expert working in the area of environmental and sustainable resource management and assessment.

He holds a First-Class Honors degree in Ecology, a Masters in Conservation from UCL and Doctorate degree from the University of Aberdeen. Martin has also attained Management Membership of the Institute of Environmental Management and Assessment (IEMA) and Chartered Environmentalist status in 2016.

Martin has more than 25 years of experience in sustainable resource and is currently employed as Hazardous Waste Specialist with the Rapid Environment and Climate Technical Assistance Facility (REACT) under UNEP to provide technical assistance to global UN peacekeeping missions on solid and hazardous waste management.
Mathieu Grenade, IFRC

Mathieu is a Senior supply chain executive with more than 15 years of experience driving efficiency and effectiveness in global supply chain and green supply chain, in primarily large, global organizations. He is acknowledged for the ability to analyse and develop strategies that achieve objectives, control costs and contribute to overall organization profitability, social responsibility and sustainability.

Mathieu is currently the Program Manager, Asia Pacific Regional Logistics, Procurement and Supply Chain Excellence for IFRC.
Double competency: environment (Masters degree in environment) and supply chain (MBA in procurement, MS in supply chain, MC in green supply chain)
