GLC STRATEGY
DRAFT STRATEGY

VISION

Fast and predictable humanitarian logistics operations that provide the right inputs for saving lives and for the delivery of humanitarian relief to affected populations.
Ensure the humanitarian community has the ability to save lives through timely and reliable logistical service support and information.
DRAFT STRATEGY

VALUES

1. Accountability
2. Partnership
3. Professionalism

PANDEMIC PREPAREDNESS
Pandemic preparedness

A Global Supply Chain Initiative (P.P.P.)
A pandemic is the **worldwide** spread of a **new** disease.
Some background

Initiative (Ebola related)
World Economic Forum Davos 2015 discussion on P.P.P. (WFP, WHO, H. Schein)

Objective:
Establish a global level platform focused on the supply chain in pandemic response harnessing the respective strengths and mandates of governments, medical pandemic technical experts, logistics actors, private sector partners, INGOs, NGOs, as well as UN agencies resulting in a global supply chain for pandemic response

Action:
WFP to form a public-private partnership initiative with Henry Schein, WHO UNICEF, and others to elaborate on this concept, develop a project and advocate for funding to enable the establishment of a global integrated supply chain to enhance pandemic preparedness.
A working group & common objectives

- Virtual Supply chain of critical items (for Pandemic response)
- Strategic Reserves
- Real time Information tracking system on private sector production/capacity
- Standardisation of equipment, supplies & services (normative guidance)

Logistics cluster lead

- Henry Schein
- UPS
- BD
- WFP, WHO, UNICEF, WB
- CDC Atlanta
- University of Minnesota
- Private Public Partnership
- WEF
1/ Try to map vulnerable countries

2/ Identify categories of diseases with potential large scale geo & societal impact

3/ Identify the response strategy & related supplies

4/ Pre-identify critical items, services and related standard specs

5/ Attempt to quantify critical items per disease

68 Items (as a start)
Risk estimation approach

- Country Severity (TVI profile: transmission-virulence-impact profile)
- and Vulnerability profile concept (high risk Population and capacity to respond)
- Vulnerable settings (IDP & refugees)
- Past experience on major outbreaks and pandemics (Ebola, H1N1, H7N9/ H5N1, Cholera Haiti, Zimbabwe...) Epi data review
- Endemicity, immunity, reservoirs
- Priority countries (GAVI + PIP targeted)
- Accessibility

Not to be published
Potential Risks

- SARI
- Cholera
- Ebola Marburg
- Influenza
- Rift Valley Fever
More activities ahead

- Monitoring tool of global production and service capacity (data sharing system ensuring enough confidentiality)
- Log Cluster to be the owner of this tool (?)
- Access to Virtual and strategic stocks: For partners, for Member States
- Legal aspects and procurement mechanisms
- In-kind donation vs. procurement
- Associated needs: e.g. food
- Innovation /R&D
- Risk and assumptions: business continuity
- Sustainability of a working group and strategy development. Steering mechanisms. Mission statement
- Meeting in WHO 7/8 Jan 2016 & Next Davos summit 2016
TEAMWORK
Share Victory. Share Defeat.
THANK YOU
COFFEE BREAK

Session will re-start at 15:30
PREPAREDNESS
UNHCR Project MATATU

Nov 16th, 2015
Project Phases

- Phase 1 of project – analysis and formulation of implementation plan
  - February 2015 – March 2016
  - Approved by HQ CoC in December 2014

- Phase 2 of project – piloting and global roll out
  - April 2016 – Dec 2017 (estimated)
  - ICTGB approval required
  - To be presented at first ICTGB session in 2016
Bring dignity to Persons of Concern:

- Transparency and efficiency in delivery of material assistance;
- Seamless, end-to-end, delivery management using GS1 Standards;
- Linked supply chain and distribution management;
- Interoperability among agencies; and
- Sector-wide scalability of solution designs.

Phase 1 focuses on analysis and development of recommended future solutions.
Expected Benefits

Qualitative benefits foreseen:

• Establishing link between Supply Chain and Distribution processes
• Increased transparency and control along the entire chain
• Increased process and information reliability (particularly at warehouse and distribution levels)
• Timely and accurate information in distribution databases and assistance records
• Increased accountability to Persons of Concern and Donors
• Inventory information across different locations delivered timely and accurately
• Support in meeting IPSAS requirements
• Better information exchange with third parties (e.g. logistics service providers)
• Interoperability among agencies
• Better tracking of assistance in high risk conflict operations
## High Level Project Schedule

Pilot Project planned

Pilot project

- Initial project plan created, linked to the overall project plan.
- Five scenarios for a pilot project defined (all LM inclusive)
  - Goal: Provide options to accelerate the pilot whilst maintaining the focus on the “handshake” between Supply Chain and Last Mile
- Draft decision document attached as Annex to this document.

Questions?
UNHRD
United Nations Humanitarian Response Depot (HRD) Network

Global Logistics Cluster meeting
Budapest, November 2015
UNHRD Network Strategy 2014 - 2017

PILLAR 1
Operational Response
• Response within 24-48 hours
• Expanded Customer Service capacities
• Sourcing and stockpiling strategy
• Augmented field presence at onset of emergency (RRT)
• Support to downstream supply chain

PILLAR 2
Efficient Processes
• Innovative supply solutions (LAB)
• Item standardization
• Products and services catalogue
• Warehouse optimization (barcoding)
• Performance monitoring and reporting tool (Dashboard)

PILLAR 3
Network Outreach for Preparedness
• Connecting UNHRDs to other prepositioning capacities (national depots, forward locations, staging areas)
• Support to regional and national prepositioning and Disaster Risk Reduction strategies (Global Partnership for Preparedness)
• Advance prepositioning of white stock

PILLAR 4
Long Term Sustainability
• Strengthen partnerships (become part of prepositioning and response strategies)
• Broaden donor base including private sector
• Increase volume of activity and diversify services
• Increase visibility of UNHRD services and Partner activities
**KEY INVESTMENTS**

**Rapid Response Deployment**
- Trained team for deployment
- Equipment for RRT staff and operations
- Support to Cluster, RMMI and Partners

**NFI Supply and Strategic Stockpiling**
- Strengthened procurement, stockpiling strategy, sales and replenishment
- Developing UNHRD LAB (Brindisi, Las Palmas, UAE)

**Network Reach**
- Mapping and partnering with global humanitarian stockpiling initiatives to build a wider, more comprehensive network

**Hub Optimization**
- Upgrading systems to support operations, and enhancing analysis/reporting capabilities
- Optimizing space and sustainability in hubs, and improving stock management

---

**OVERVIEW**

**Rapid Response Deployment**
- Swiss STBY/P kick starting project
- RRT training in Brindisi (November 2015)
- Simulation exercise in UAE (2016)

**NFI Supply and Strategic Stockpiling**
- HPC certification
- Supply Chain Manager onboard
- Stockpile analysis and mapping, review of ceilings and replenishment strategy
- Technical evaluation following e-Catalogue tender underway

**Network Reach**
- Global Partnership for Emergency Preparedness (GPEP) concept documented;
- first review of ‘package’ material
- ASEAN assessments for satellite prepositioning
- APS Report for Kampala (Douala, Djibouti)
- Engagement with DR and RSA

**Hub Optimization**
- SC management monitoring and reporting tools under development (dashboard)
- New racking for Accra and Kuala Lumpur
- Review/fine-tuning of barcoding in Dubai

---

**CURRENT STATUS**

**Rapid Response Deployment**
- Swiss STBY/P kick starting project
- RRT training in Brindisi (November 2015)
- Simulation exercise in UAE (2016)

**NFI Supply and Strategic Stockpiling**
- HPC certification
- Supply Chain Manager onboard
- Stockpile analysis and mapping, review of ceilings and replenishment strategy
- Technical evaluation following e-Catalogue tender underway

**Network Reach**
- Global Partnership for Emergency Preparedness (GPEP) concept documented;
- first review of ‘package’ material
- ASEAN assessments for satellite prepositioning
- APS Report for Kampala (Douala, Djibouti)
- Engagement with DR and RSA

**Hub Optimization**
- SC management monitoring and reporting tools under development (dashboard)
- New racking for Accra and Kuala Lumpur
- Review/fine-tuning of barcoding in Dubai
Sourcing and Stockpiling Strategy

Stock Analysis and Mapping
- Highest rotating stocks according to volume and value
- Current sourcing options (LTAs, White Stocks, Virtual Stocks)

Review Process
- Validate or redefine sourcing strategy of stocks
- Identify new ceilings on new assumptions (per Cluster items and with respective Cluster leads)
- Identify new products which need to be availed

New Sourcing Strategy
- Items to be stockpiled
- LTAs with supplier commitment
- LTAs w/out supplier commitment
END OF DAY TWO
