  - 39% To advocate for logistics issues with the wider Logistics Cluster community
- 83% Exchange ideas
  - 50% To provide high level feedback on issues and topics related to the Logistics Cluster
- 50% To advocate for logistics issues with the wider Logistics Cluster community
It would be great to continue the trend of bringing GLC meetings to the regions.

More time to discuss ideas and topics. Very presentation heavy, with limited time to discuss.

Security Access discussion was brilliant!

Good to have long coffee break to interact with other participants.

Country feedback sessions were great, informative and very relevant. The mix of regional feedback and global issues was useful.

Being a professional logistics practitioner and associated to National Disaster Management Authority, Logistics Cluster Meeting was beneficial for me as an individual and part of professional grooming.

More time for discussion on administrative and security access would have been brilliant, but what we had was sufficient.

Satisfied with variety of content

- 94% Just right
- 6% Too much

IDEAS FOR THE NEXT MEETING

- More on access
- Inter-cluster coordination
- Green supply chains and how to coordinate them to avoid duplication of effort
- Plastic in the supply chain and how to meet changing import procedures
- Minimum operating standards required from all partners for logistics operations
- Best and worst practices in humanitarian logistics
- Common messaging platform for field communications
