**BACKGROUND**

The WFP-led Logistics Cluster was activated in Syria in January 2013, in order to facilitate access to crucial logistics services for all operations across the region, including surface transportation, contingency fuel provision and storage, cross-border transhipment services, and warehousing.

In September 2014, the Whole of Syria (WOS) approach was adopted as a result of the UN Security Council Resolution (UNSC) 2165, bringing together regional separate operations into a single framework.
