2019 OVERVIEW

COORDINATION
In a geographically vast country, coordination and information remains critical for humanitarian operations. This year, the Logistics Cluster held 55 coordination meetings in seven locations across DRC to provide a forum for humanitarian organisations to gather and exchange information on logistics issues and challenges.

INFORMATION MANAGEMENT
Timely and accurate logistics information is critical for responders on the ground. The Logistics Cluster worked to support the humanitarian community through the publication of 237 information management updates, including 97 maps detailing accessibility and general logistics information.

ADVOCACY
Throughout the year, the Logistics Cluster continued to advocate on behalf of the humanitarian community for the rehabilitation of key infrastructure to improve humanitarian access to isolated communities. Key projects included the rehabilitation of the runway of the Tshikapa and Moba airport and the deployment of mobile rapid response teams to strengthen emergency response capacity to restore infrastructure in Tanganyika, Nord Kivu, Sud Kivu, Maniema, and Kasai Provinces.

ORGANISATIONS SUPPORTED

- 5% RED CROSS/RED CRESCENT
- 10% UN AGENCIES
- 34% INGO
- 50% OTHER
- 1% 55 COORDINATION MEETINGS

- 7 LOCATIONS

INFORMATION MANAGEMENT

- 97 MAPS
- 237 INFORMATION MANAGEMENT UPDATES
- 3,754 DOCUMENT VIEWS
