The Logistics Cluster was activated in Ethiopia on 29 April for a period of six months. Based on the identified needs expressed by the humanitarian community through the Gaps and Needs Analysis, the Logistics Cluster will deliver on its core functions within Ethiopia; to provide accurate and timely information management and coordination, and to facilitate access to reliable logistics services. The facilitation of common services requested will be conditional to the availability of funding necessary for their implementation.

**CHALLENGES AND IMPACT**

The Logistics Cluster is supporting the Government of Ethiopia in containing the spread of COVID-19 along the Djibouti corridor by providing temporary infrastructure for the set-up of screening centres and waiting areas at the border of Djibouti.

**FUNDING**

The Logistics Cluster plans to provide additional infrastructure at entry-and-exit points and other locations in Ethiopia to support partners in their response against COVID-19 and to support other humanitarian needs.

**TOTAL REQUIREMENT USD 46.8 MILLION**

- **Funded**: 4%
- **Required**: 96%

**ALLOCATION OF AVAILABLE FUNDING TO DATE**

- **Staff**: 10%
- **Equipment and Infrastructure**: 66%
- **Transport (Air and In-Land)**: 24%
