1. End of Logistics Cluster Services

- The Logistics Cluster Coordinator announced that this would be the final Logistics Cluster coordination meeting.

- WFP will send a formal request to the Resident Coordinators to request the de-activation of the Logistics Cluster at the end of December 2014.

- The Logistics Cluster Coordinator reminded participants that WFP can provide services on a cost recovery basis and that the Logistics Cluster will always remain available to provide information and guidance on logistics related activities and contacts if need be.

- One participant announced that they are currently working to bring shelter boxes to Gaza and they will inform the Logistics Cluster/WFP in case they need any support.

2. Key Statistics

- The Logistics Cluster Coordinator presented key statistics which illustrated cargo movement since the activation of the Logistics Cluster on 30 July. The primary humanitarian transporter moving aggregate and cement into Gaza has been UNRWA, while the transport of these items through the commercial sector has remained very limited.

- The number of trucks entering Gaza through Kerem Shalom peaked in the second half of October, and again on 19 November, when the number of the trucks that crossed into Gaza exceeded the maximum capacity set by the Israeli crossing authority (450 trucks per day).

- The Logistics Cluster Coordinator reported that the point of origin for the aggregate and cement trucks entering Gaza included Jordan, Israel and the West Bank.

- Construction material entering Gaza reached its peak in mid-October with 108 truckloads.
### 3. Closing Issues

- The Logistics Cluster Coordinator informed participants that a number of inconsistencies were found in the information shared by various organisations regarding crossings and that a meeting has taken place between the involved parties to find a way to avoid such discrepancies.

---

*Starting January 2015, Logistics Cluster Coordination will no longer be operational, and meetings will no longer be held.*
