Operational Updates

- Between 17 October and 04 June, a total of 37,854 m³ of humanitarian cargo, equivalent to 7,346 mt, has been received for storage, and 6,744 m³ equivalent to 1,560 mt has been transported on behalf of 36 humanitarian organisations across the 17 different Logistics Cluster hubs.

- Since the military operation to retake Mosul began on 17 October, over 500,000 people have fled the area and 379,000 remain displaced (source: http://iraqdtm.iom.int/EmergencyTracking.aspx). Current capacity in existing IDP camps and resources are stretched due to the high influx of displacement and the complexity of the operational environment.

- Humanitarian organisations are requested to communicate on any key operational areas that are experiencing logistics gaps and would require support and services from the Logistics Cluster.

Common Storage

- The Logistics Cluster currently provides 25,500 m² of common storage to the humanitarian community across 17 hubs throughout Iraq. As of 04 June, the Logistics Cluster was currently storing 9,230 m³ (equivalent to 1,795 mt) of relief commodities on behalf of 25 organisations. Additionally, the Logistics Cluster is currently loaning 15 Mobile Storage Units (MSUs) to eight different organisations to expand their own storage capacities in key operational areas.

- Three MSUs have been erected in Nargizlia 1 (480 m²) and New Zelikan (240 m²) camps to support common storage needs; these are being managed by an NGO partner on behalf of the Logistics Cluster and are now ready to accept humanitarian consignments.

- Four MSUs (960 m²) have been erected in Salamiyah to assist in providing common storage for the UNHCR camp; these are also ready to receive humanitarian cargo. Depending on organisations’ needs, the Logistics Cluster can increase the capacity in the coming weeks.

- The Logistics Cluster has conducted site visits to all three of these new locations to liaise with the cooperating partner and ensure they are running smoothly.

Logistics Cluster Updates

- An additional twenty MSUs (10x24 and 10x32) have arrived in Erbil and are available for quick deployment to set up common storage or scale up capacity in key operational locations throughout the country, and also to loan to humanitarian organisations.

- The Logistics Cluster conducted a two-day Warehouse and Commodity Management training in Dahuk on 22 – 23 May, which was attended by 35 people from 24 different humanitarian organisations. Due to the high interest, a second session will be held on 12 – 13 June for a further 32 participants from 20 organisations, and sessions will also take place in Erbil and Baghdad in the following months.

- Logistics Cluster Induction trainings will be held in Dahuk, Erbil and Baghdad in July; invitations will be sent out once times and locations are confirmed.

- The Logistics Cluster has updated the Concept of Operations map, which is available here: http://www.logcluster.org/map/concept-operations-map-mosul-june-2017.
• All Logistics Cluster reference documents, including past meeting minutes, maps and access procedures are available online at: http://www.logcluster.org/ops/irq14a.

### One Stop Shop (OSS) for Customs Clearance

- The Logistics Cluster is preparing a snapshot to outline access procedures for the Dahuk area (Sahela and Khorsabat checkpoints); it will be circulated soon.
- The Joint Crisis Coordination (JCC) centre in Dahuk presented the updated customs clearance procedures for actors operating from Dahuk at the previous Logistics Cluster coordination meeting (24 May). The presentation from this meeting will be circulated by the Logistics Cluster as soon as possible.
- Representatives from the JCC in Erbil and the Ministry of Health attended the last coordination meeting in Erbil for a question and answer session on the requirements and procedures for the clearance of medical items. The outcomes of this discussion were shared in the [Erbil meeting minutes](http://www.logcluster.org/ops/irq14a).
