The Logistics Cluster is currently facilitating the shipping of 1,470.8 m3 of cargo on behalf of organisations for the El Niño response from Mombasa to various ports in Somalia. The WFP time charter vessel departed Mombasa on Saturday 31 October 2015 and is expected to deliver the cargo by the end of November. Breakdown per agency below:

The Logistics Cluster has not yet received any funding; therefore organisations are urged to factor this into their respective budgets.

The Logistics Cluster provided a list of logistics assets in Somalia, available to interested organisations on a cost recovery basis:

- 1 cargo plane with 5mt capacity based in Mogadishu (WFP)
- 1 helicopter with 3mt capacity operating from Mogadishu and daily delivering to Bulo Burte (WFP)
- 2 fiberglass boats with engines in Jowhar, 1 in Mogadishu, and 3 in Kismayo (WFP)
- 7 boats (5 inflatable and 2 fibreglass). Interested participants have to channel requests through the WASH Cluster. However users will be required to provide fuel and operator.
- Inflatable boats might not be suitable in the current context due to the quantity of debris floating in the rivers.
- Warehouses available in Mogadishu, Jowhar and Kismayo (WFP and WASH partners);
2. Access Constraints

- Roads are inaccessible in villages close to Mahaday, due to the recent and ongoing rainfall.
- Roads from Mogadishu to surrounding areas are open and no damage has been reported.
- Road from Galkayo to Beletweyne is accessible; however, the road from Beletweyne to Huddur and Rabdhure via Elbarde is inaccessible due to heavy rains.
- Roads from Kismayo to Afmadow, Badade and Jilib are reported to be inaccessible due to insecurity or/and the ongoing rains.
- Roads from Kenya to Mandera are accessible. The Logistics Cluster continues to facilitate the delivery of humanitarian goods using normal trucks to Mandera, Dadaab, and Ijara without difficulties.
- Beletweyne airstrip is now practicable. However, the runway condition is to be checked upon prior to flight.
- Bulo Burte is accessible by helicopter.
- The remaining airstrips are practicable. However, they risk being damaged by upcoming rains. Wajid, Huddur, Garbaharey, and Tieglow airstrips will require clearance to facilitate the operations.

3. Organisations Updates

- Save the Children plans to preposition Non Food Item (NFI) kits in Beletweyne, to target around 1,000 beneficiaries.
- ACF sent a team to Jowhar to conduct a needs assessment. In addition they have WASH kits in Mogadishu ready to be prepositioned to surrounding areas.
- ACTED plans to carry out an assessment in Jowhar and is currently gathering the necessary information to facilitate this exercise.
- IOM, INTERSOS, ADRA and Trocaire are still planning the most appropriate El Niño response.
- Solidarites International is making final preparations to open up bases/programmes in both Lower Juba region (Dhobley) and Hiran region (Beledweyne).
- UNHCR
  - Looking at distributing 20,000 NFI kits targeting 20,000 households.
  - 13,000 NFI kits have been prepositioned in Kismayu and Mogadishu.
  - Additional kits are available in Nairobi and are planned for delivery to various regions in Somalia in the upcoming weeks.
- WFP
  - WFP has prepositioned 400mt of assorted food commodities in Jowhar, Beletwein and Afgoye.
  - Additional 300mt will be prepositioned in Jowhar.
- UNICEF
  - Prepositioned nutrition, WASH and medical supplies to various regions of Somalia in September and October.
  - Currently distributing 500,000 mosquito nets throughout Somalia. Additional 900,000 have arrived in Mombasa last week.
  - National Measles campaign plan to commence in mid-November.
- WASH Cluster
  - Has prepositioned 10,000 empty bags in Mahaday that will be used to seal river embankments.
  - The WASH cluster has also prepositioned pumps and hygiene kits.
- UNHAS
  - UNHAS is able to mobilize extra air assets to Somalia within 7-10 days once confirmation from agencies is received.
UNSOA

- UNSOA GIS officers have developed a mapping tool based on information received from the Logistics Cluster and which can be accessed by organisations. Partners can also print the maps, however editing credentials will only be given to the Logistics Cluster coordinator and assistant to facilitate regular updating. All information pertaining to accessibility and that need to be included in the maps will be channeled through the Logistics Cluster.
- The information was shared in detail through a presentation during the meeting, on the various maps and facilities available to update to suit partners’ needs.
- Maps are available at the following link: [www.somalia-gis.org/portal](http://www.somalia-gis.org/portal)

The next meeting is scheduled in two weeks’ time. Details to be shared via the mailing list.
