LOCATION: WVI Office, Quelimane

DATE: 11 March, 2015

CHAIR: WFP Logistics Officer

PARTICIPANTS: WFP, COSACA (consortium of Concern, Save the Children and CARE International), UNHAS, UNICEF

ACTION POINTS:
- Organisations requested to share information on cargo requiring air transportation;
- The Logistics Cluster to share additional updated access constraints information;

AGENDA:
1. Air Operations Update
2. Land Transportation Update
3. Challenges, Constraints and AOB.

1. Air Operations Update

- It was confirmed that, following the receipt of OFDA and ECHO funding, sufficient resources were now available to maintain the helicopter operations in Zambezia Province until 31 March.

- Discussions took place regarding the helicopter crew work hours. It was confirmed that the crew has a limit of 100 flying hours per month for the crew. Within the last 10 days, they have completed 38 hours.

- The limitations on crew working hours may mean reducing operational hours or there may be a risk that helicopter will be grounded early or both Saturday and Sunday may have to become crew rest days.

- Considering the recent flooding in Nampula Province, the possible relocation of the air operation is being investigated. Should this be confirmed, critical planning to complete the operation in Zambezia Province is required.

- In order to plan accordingly, the Logistics Cluster requests all organisations to share information on their cargo which requires transportation.

http://www.logcluster.org/ops/moz15a
2. Land Transportation Update

- Concern was expressed regarding the lack of accuracy on truck loads figures that are being communicated. For example, two trucks were requested but the cargo requiring transportation is sufficient for one truck.
- In addition, it has been reported that trucks are required to wait days before being able to unload at Murrumbala due to a lack of warehouse space.

3. Challenges, Constraints and AOB

- Organisations were advised of the updated Logistics Cluster Access Constraints Map available on the Logistics Cluster website and on the following link: http://www.logcluster.org/map/moz-access-constraints-map-10-march-2015
- Additional updated information regarding access constraints was requested.
