SOUTH SUDAN
2019 OVERVIEW

A year after the signing of the Revitalized Agreement on the Resolution of the Conflict in South Sudan (R-ARCSS), the ceasefire holds in most parts of the country. The improved political-economic context resulted in improved access for humanitarians operating in South Sudan and enabled the Logistics Cluster to drive logistics efficiencies by expanding the use of road and river transport modalities.

In October 2019, unprecedented flooding affected nearly 1 million people and the Government of South Sudan, the Humanitarian Country Team and the Inter-Cluster Coordination Group declared a state of emergency. The Logistics Cluster scaled up its logistical support to the humanitarian community in additional to its usual support to the ongoing response.

COORDINATION

To address common logistics gaps and minimise duplication of effort, the Logistics Cluster continued to provide logistical coordination.

A total of 79 coordination meetings were held in seven locations.

INFORMATION MANAGEMENT

In 2019, the Logistics Cluster provided critical information to partners to facilitate their operational decision-making.

Throughout the year, 28,200 page views of operational documents were recorded.

COMMON SERVICES

The Logistics Cluster continued to expand its use of road and river transport to ensure the most efficient humanitarian response.

In 2019, the Logistics Cluster more than doubled the number of river movements compared to the previous year, and reached locations by road that were previously only reachable by air.
