LOCATION: Logistics Cluster Office, WFP Logistics Base
DATE: 25 May 2017
CHAIR: Logistics Cluster Wau
PARTICIPANTS: FAO, OXFAM, International Medical Corps (IMC), UNOCHA and UNICEF

AGENDA:
1. Logistics Cluster Operational Update
2. Western Corridor Convoy Coordination
3. Access Constraints
4. Partner Updates and AOB

1. Logistics Cluster Operational Update
- Logistics Cluster Wau has coordinated two Mobile Storage Units (MSUs) for common storage with a total of 440m² storage capacity. Currently 270m² is available at no-cost-to-user for humanitarian organizations to use for prepositioning of cargo.
- Logistics Cluster continues to support humanitarian organizations with Common Transport Service (CTS) trucks to deliver cargo for distribution and to support partners with reception of air cargo. The Logistics Cluster supported Oxfam with CTS trucks to deliver their cargo for distribution in PoC A, and also supported ACTED with CTS trucks to deliver their cargo to the common storage site.
- The dispatch of cargo for humanitarian organizations from the common storage coordinated by the Logistics Cluster is ongoing for distribution in collective sites. Currently cargo from UNOCHA, OXFAM, IMC, WFP and ACTED is being stored in the common storage site coordinated by the Logistics Cluster.

2. Western Corridor Convoy Coordination
- Logistics Cluster is supporting convoy coordination along the Western Corridor, including Wau. Convoys will depart Juba every two weeks during the dry season.
- Organisations are responsible for obtaining trucks and necessary clearances from Relief and Rehabilitation Commission (RRC) and Joint Verification Monitoring Mechanism (JVMM) to participate in the convoy.
- Logistics Cluster Wau received the Western Corridor Convoy which departed from Juba on 18 May and dispatched the convoys to their various final destination points.
- The next Western Corridor Convoy is scheduled to depart from Juba on 1 June. Organisations who are interested in joining should inform the Logistics Cluster by 27 May, i.e. five days before departure.

3. Access Constraints
- The Juba to Wau route (via Terakeka and Rumbek) takes five days.
- The Wau to Raja road is still closed for humanitarian access due to insecurity.
- Currently, the best route from Wau to Raja for humanitarian access is via Aweil.
- The most recent Access Constraints map can be found using the following link:

Link to map: http://www.logcluster.org/map/south-sudan-access-constraints-map-26-may-2017
4. Partner Updates and AOB

- Partners agreed that the next Coordination meeting will be hold at Oxfam’s office.
- UNICEF informed the Logistics Cluster that their request for CTS trucks to deliver Education Material to Jur River County is postponed.

The next Logistics Cluster coordination meeting in Wau will be hold Thursday, 9 June 2017 at Oxfam’s office at 15:00hrs
