**Background**

Based on the Logistics Rapid Assessment (LRA) recommendation and the request of the Humanitarian Country Team (HCT) the Logistics Cluster was activated in May 2010. A Logistics Coordination Cell was established in Sana’a and has been providing the services outlined below in October 2014.

**Coordination**

The Logistics Cluster facilitates logistics coordination and emergency response in support of the humanitarian community under the Cluster approach. Regular Coordination meetings are held with 41 humanitarian organisations in Sana’a and at field level to discuss logistics bottlenecks and develop common solutions to improve the humanitarian response.

**Information Management**

The Logistics Cluster provides regular Information Management products such as GIS maps (road maps, ports, and airports), meeting minutes and other information management products, all of which are available at the dedicated Logistics Cluster Yemen webpage: [http://logcluster.org/ops/yem10a](http://logcluster.org/ops/yem10a). During October, an online flight booking application training was also provided to facilitate greater access to the UN Humanitarian Air Service.

**Common Transport and Storage**

- In October, the Logistics Cluster facilitated four flights to Sa’ada which transported 27 passengers, among others, from ICRC, IR, OCHA, UNDP, UNICEF, and WHO.
- The Logistics Cluster also facilitated the transportation of light cargo between Sa’ada and Sana’a on behalf of humanitarian organisations.
- The Logistics Cluster erected one Mobile Storage Unit (MSU) in Sana’a with a total capacity of 300 MT, available for use by the humanitarian community, and has plans to erect two more MSUs in Haradh.

**Fuel**

- The Logistics Cluster continues to provide fuel to humanitarian partners. The Service Level Agreement (SLA) has been implemented on a full cost recovery basis. The Logistics Cluster has three fuel distribution systems in Sana’a, Aden and Haradh with total capacity of 424,000 liters.
- In October a total of 72,650 liters of fuel was received from the supplier and 27,154 liters of fuel was distributed to SCI, FAO, WFP, RI, WHO, IMC, NRC, ADRA, UNFPA, IOM, AMIDEAST, UNHCR, IRC, IMF, OCHA, OXFAM, DRC, and CSSW.
- As of 31 October, available fuel stock is 229,282 liters.
