

- LOCATION:** UNICEF
- DATE:** 13 June 2018
- CHAIR:** Logistics Cluster
- PARTICIPANTS:** Handicap International, UNHCR, UNICEF, UNOPS, SHS, Mirrors, ACF, Sanid, CYF, MSF-CH, MOPIC, YFCA, Global Communities, BFD, DRC.
- ACTION POINTS:**
- Logistics Cluster to prepare map of Hodeidah city, representing where the warehouses of humanitarian organisations are.
- AGENDA:**
1. Situation Update
  2. Common Logistics Services
  3. AOB

## 1. Situation Update

- The Logistics Cluster invited participants to share any transport and/or storage request as part of the Hodeidah response plan, to have visibility on the upcoming needs of humanitarian organisations and prepare accordingly. Trucks are on standby in Hodeidah, Sana'a and Aden for organisations requiring inland transport; the dedicated fleet could be increase base on needs, with different trucks capacity depending on the final delivery points.
- The Logistics Cluster Coordinator held a presentation in front of the Humanitarian Country Team to secure resources from the Pooled Funds destined to preparedness activities, which include: procurement of 15 Mobile Storage Units (MSUs), prepositioning of an aircraft in Djibouti for cargo airlifts to Sana'a, and equipment for the Djibouti airport to increase its handling capacity. Further details on each activity can be found in the relevant sections below.
- The Logistics Cluster invited participants to complete the mid-year survey available at: [www.surveymonkey.com/r/LogisticsClusterYemenUserSatisfaction](http://www.surveymonkey.com/r/LogisticsClusterYemenUserSatisfaction). An Arabic translation will be made available soon.

## 2. Common Logistics Services

- **Airlifts:** WFP will renew the long-term contract with Air Djibouti to have an aircraft prepositioned in Djibouti for the next three months to carry 400 mt of cargo to Sana'a for the Logistics Cluster. Organisations are invited to share their pipeline for the Logistics Cluster to be ready, and for the HCT to be able to prioritize the cargo based on the current needs, especially in light of the Hodeidah response. A tentative schedule until the end of 2018 is available on the cluster website at the following link: [www.logcluster.org/document/yemen-tentative-airlifts-schedule-2018](http://www.logcluster.org/document/yemen-tentative-airlifts-schedule-2018)
- **Sea Transport:** due to the situations in Hodeidah, cargo transport on the VOS Theia is currently on hold until further notice. The VOS Apollo service will resume on Sunday 17 with voyage 111; voyage 110 was cancelled as VOS Apollo travelled to Hodeidah alongside VOS Theia as contingency vessel. SOPs and schedules for passengers and cargo are available on the Logistics Cluster website at: [www.logcluster.org/ops/yem10a](http://www.logcluster.org/ops/yem10a)

- **Overland transport:** the Logistics Cluster facilitates access to a dedicated fleet of 25 trucks across Sana'a, Hodeidah and Aden, and can obtain security clearances and deconfliction on behalf of service users. The number of trucks can increase if need be, however in order to do so, the Logistics Cluster needs to have visibility on the upcoming transport requests.
- **Storage:** 15 MSUs will arrive at the end of June in Sana'a. These MSUs will be available to be loaned to organisations requiring temporary storage; for any urgent request before the arrival of the MSUs, the Logistics Cluster can liaise with WFP to leverage on their stocks.
- **Fuel:** the Logistics Cluster communicated to participants that the new price of diesel and petrol will be USD 0.90/litre in all WFP fuel stations, starting from 14 June. Due to market fluctuations, this price is subject to change in the future.

### 3. AOB

- One organisation raised a question on the possibility of UNHAS flights and cargo flights from Sana'a to Mareb. This seems unlikely, however the request should be raised with the UNHAS Steering Committee.
- The Global Logistics Cluster Coordinator will be on mission in Sana'a from 19 June for two weeks.
- The Logistics Cluster will ensure that security clearance for land movement is applied on behalf of service users.

*The next meeting will be held on the first week of July.*

#### Cargo requests

#### Passenger requests
