BANGLADESH

2019 OVERVIEW

COORDINATION
In 2019, 32 coordination and health logistics meetings were held to minimise duplication of effort, provide a platform to share technical expertise, and promote collaboration across the humanitarian community.

INFORMATION MANAGEMENT
103: the number of updates published in relation to the Rohingya response detailing key logistics information. Five Assessments were also carried out with partners to support decision-making processes. Furthermore, with support from Global Logistics Cluster an online Physical Access Constraint tool was designed and developed for data collection and visualization of road restrictions and constraint in Cox’s Bazar.

COMMON SERVICES
Throughout 2019, the Logistics Sector supported partners overcome identified logistics gaps, facilitating access to three common storage hubs on behalf of 24 partner organisations.

CAPACITY STRENGTHENING
For an effective humanitarian response, preparedness is key. Throughout the year the Logistics Sector team undertook meetings with various partners on preparedness activities, as well as delivering a robust training programme. In addition, contingency stock was also made available to partners during cyclone and monsoon season. This included containers, asset protection boxes, sandbags, car kits, generators, light towers and MSUs.
