Reception of cement from SMEP

## Background

In 2020, the Logistics Sector continues to work with partners to address common logistics gaps and challenges in Cox's Bazar and ensure an efficient humanitarian response. The Rohingya Response Strategy maintains focus on strengthening collaboration amongst international and national partners, synchronising logistics decisions, producing and sharing key information, and facilitating access to common logistics services to support partners' logistics operations.

In the lead-up to the monsoon and ensuing cyclone seasons, the Logistics Sector is focusing its efforts on planning and reinforcing partner capacities and preparedness. Also, since mid-March, the Logistics Sector focused on planning, preparedness and obtaining health materials in response to the COVID-19 pandemic. Previous sector activities that do not support WASH, Health or food distribution have been reduced to a bare minimum in line with current humanitarian priorities. To support effective decision

making, the Logistics Sector provides technical logistics advice and access to facilities for organisations facing supply chain challenges.
