Operation Overview as of 31 October 2016

Hurricane Matthew made landfall near Les Anglais (south-western Haiti) on 4 October at 11:00 UTC, as a very intense Category 4 Hurricane. It then crossed the department of Grande Anse (south-western Haiti) provoking severe damage to road and ICT infrastructures, as well as housing and health facilities.

**Logistics Coordination, Information Management and GIS**

- The Logistics Working Group established coordination units with dedicated staff in Port au Prince, Les Cayes and Jéremie. Logistics Coordination Meetings are held in the three locations jointly with the Directorate for Civil Protection (DPC).

- A dedicated webpage has been created, where access constraints maps, situation updates, schedules of coordination meetings, meeting minutes, and other IM products and key documents are available: [http://www.logcluster.org/sector/hurrimat16](http://www.logcluster.org/sector/hurrimat16).

- Since beginning of October to date, the Hurricane Matthew webpage has produced 6,168 page visits and 80 Information Management Products have been published. Documents, updates and relevant information are also shared through a dedicated mailing list.

- The Logistics working Group supported 123 organisations with coordination and information management (94 NGOs, 4 Intergovernmental Organisations, 10 UN agencies, 12 government agencies, 3 other entities including foundations).

**Storage**

- Warehouses are currently available for interagency storage in Port au Prince (4,000 m²), Les Cayes (1,250 m²), Jéremie (1,600 m²). To date, over 12,000 m³ of relief items have been stored on behalf of twenty-two organisations.

**Road Transport**

- A fleet of off-road trucks is positioned in Les Cayes and Jéremie to support interagency distribution in the affected areas. Over 1,748 m³ have been transported on behalf of twenty-five organisations.

**Sea Transport**

- Coordinated sea transport operations (Royal Netherlands Navy and commercial landing crafts) have been bringing 678 m³ food and non-food items to the coastal areas of Corail, Abricot, Dame Marie, Anse d’Hainault Les Irois, Tiburon, Les Anglais, and Chardonnières. To maintain this critical delivery option, a regular sea transport service has been established using landing crafts, for a total capacity of 110 mt, sailing between PaP and the coastal areas.
areas in Grande Anse and Sud. Two voyages at full capacity to Tiburon and Anse d'Hainault have already been completed with food and NFIs on behalf of Concern, IFRC, Oxfam, and WFP.

**Air Transport**

- The Logistics Working Group has been coordinating the use of WFP air assets for responding organisations to transport personnel and cargo to the hard-to-reach areas. To date over 400 passengers and 50 mt of cargo have been transported to ten different locations on behalf of twenty-nine organisations.
