Hurricane Matthew made landfall near Les Anglais (south-western Haiti) on 4 October at 11:00 UTC, as a very intense Category 4 Hurricane. It then crossed the department of Grande Anse (south-western Haiti) provoking severe damage to road and ICT infrastructures, as well as housing and health facilities.

**Logistics Coordination, Information Management and GIS**
- The Logistics Working Group established coordination units with dedicated staff in Port-au-Prince, Les Cayes and Jéremie. Logistics Working Group meetings are organised weekly in all three locations, in tight cooperation with the Directorate of Civil Protection (*Direction de la Protection Civile - DPC*).
- In addition, an International Humanitarian Partnership (IHP) basecamp, with hosting capacity of 35 people, was set up in Jéremie to offer essential support to the humanitarian community working in the area.
- From the onset of the emergency the Logistics Working Group has been providing coordination and Information Management supporting over 150 humanitarian actors on the ground to deliver an effective response.
- All the operational information is published on the Hurricane Matthew dedicated webpage, accessible at the following link: [www.logcluster.org/sector/hurrimat16](http://www.logcluster.org/sector/hurrimat16)
- Since the beginning of October, the Hurricane Matthew webpage has produced 7,780 page visits and 130 Information Management products have been published, including meeting minutes, situation updates and access constraints maps produced with the help of a Geographic Information System (GIS).

**Storage**
- The Logistics Working Group facilitates common storage services in order to augment the logistics capacity to support the humanitarian response. Warehouses are currently available for interagency storage in Port-au-Prince (4,000 m²), Les Cayes (1,680 m²), Jéremie (2,080 m²) where a logistics hub constituted of 7 MSUs (24m x 10m and 32m x 10m) has been set up in three weeks becoming operational on 6 November. To date, almost 900 mt of relief items have been stored on behalf of twenty-three organisations.

**Road Transport**
- Seventeen off-road trucks are positioned in Les Cayes and Jéremie to support interagency distribution in the affected areas. Over 510 mt have been transported on behalf of twenty-five organisations.
**Sea Transport**

- The Logistics Working Group coordinated sea transport operations carried out by the Royal Netherlands Navy and with commercial landing crafts. A regular sea transport service was established by WFP between Port-au-Prince and the coastal areas in Grande Anse and Sud using landing crafts with a total capacity of 110 mt. Four voyages at full capacity were completed to Tiburon and Anse d’Hainault.

- To respond to current transport needs and to reach coastal areas not accessible by road, WFP chartered a larger barge with 500 mt capacity which arrived in country on 21 November and berthed at Port-au-Prince. On 23 November, the Logistics Working Group facilitated the loading of food and non-food items to proceed with the first rotation, foreseen for Anse d’Harinault.

- To date, a total of 738 mt of relief items have been distributed to Corail, Abricot, Dame Marie, Anse d’Hainault, Les Irois, Tiburon, Les Anglais, and Chardonnières.

**Air Transport**

- The Logistics Working Group has been coordinating the use of two WFP helicopters for responding organisations to transport personnel and cargo to the hard-to-reach areas. To date, over 980 passengers and 122 mt of cargo have been transported to 22 different locations on behalf of thirty-eight organisations.
