Project Highlights

Coordination & Information Management
- The Regional Pacific Logistics Cluster and Emergency Telecommunications Cluster Workshop was convened by Vanuatu NDMO and WFP from June 12 to 16 in Port Vila, Vanuatu. The preparation for it took up much of this Quarter.
- The workshop brought together over 100 stakeholders from countries across the South and North Pacific, including National Disaster Management Offices, government ministries, regulators, NGOs, the Red Cross, the private sector, UN agencies and CROP organisations. The theme of the workshop was Localisation and Last Mile.
- A Logistics Cluster Blog on the workshop can be found here
- The full Workshop Report can be found here

Unsolicited Bilateral Donations (UBDs)
- Jemma Pietrus, an AVID Volunteer Communications Officer has commenced her contract and will be WFP Pacific’s focal point for all UBD and PEARL project matters. She can be contacted on +679 716 8533 or jemma.pietrus@wfp.org

Stockpile Mapping and Information Sharing
- A web-based mock page was created and demonstrated to Regional Logistics Cluster members during the workshop allowing direct upload from users and instant analysis. It was received with large success.
- More work will be done in the coming months to take this concept further and implement it across the Pacific

Training and Simulations
- Contextualization and feedback activities were conducted at the workshop in Vanuatu.

Prepositioning
- Some clarity was gained during the workshop on issues such as standardisation and shared warehouses. The progress bar should be more reflective of that in the Q3 report, with progress made in countries concerned and willing to take those projects further, as expressed during the workshop.

Logistics Capacity Assessments (LCAs)
- The workshop highlighted clear areas for improvement with unanimous buy-in for the provincial LCAs.
- At a local level, national coordination structures (NDMO, logistics clusters, and others) will have to focus on collecting data and use new analysis systems.
