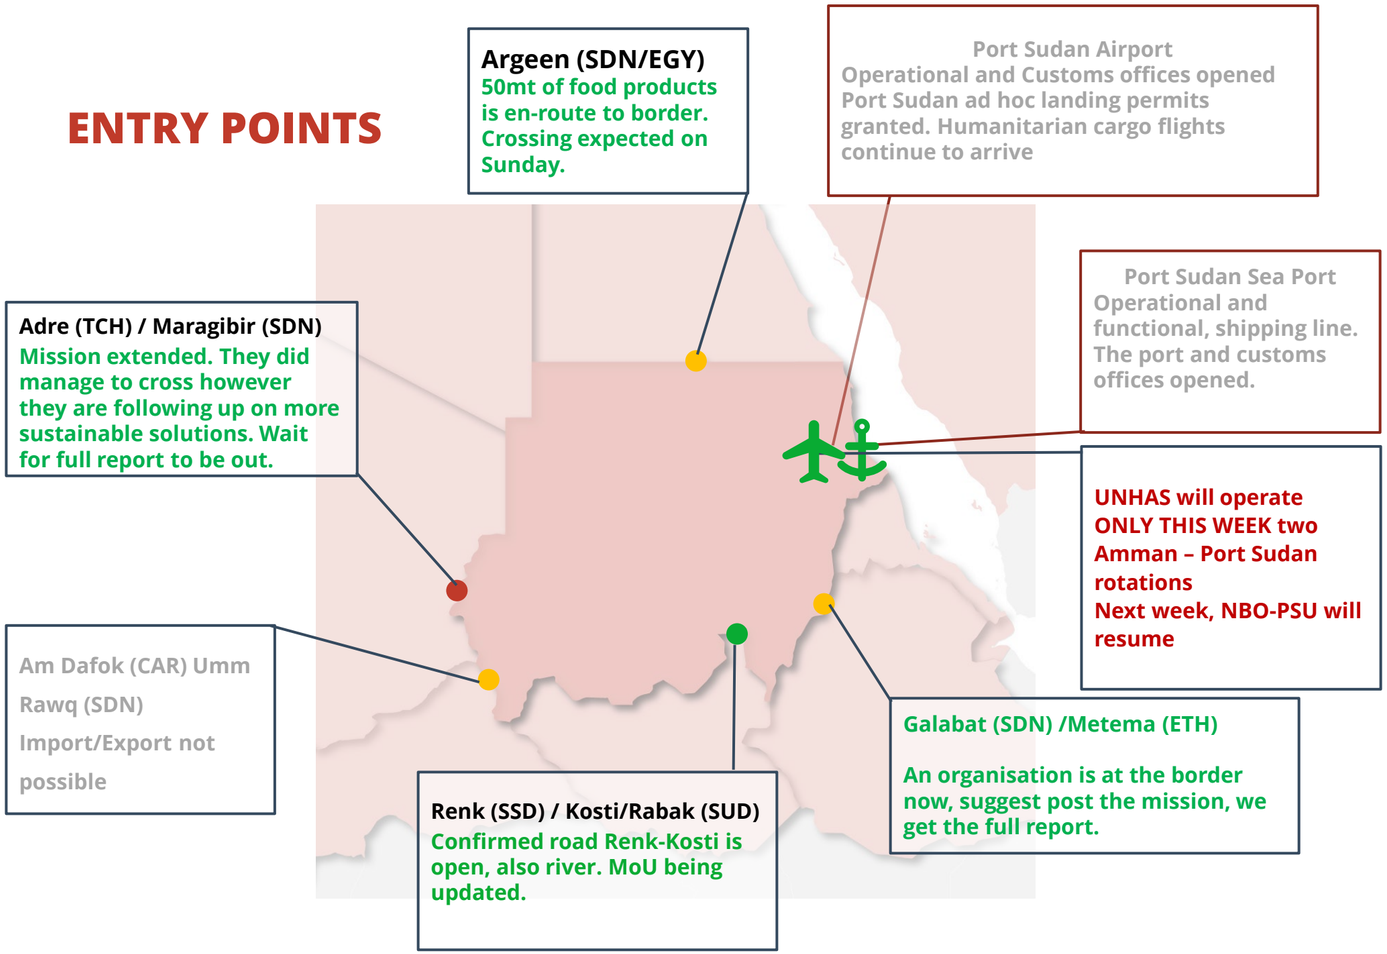
If you have any logistical information you would like to share with partners, please send an email to sdn.response.logcoordination@wfp.org

ENTRY POINTS



KEY UPDATES

- Current MoU WFP-SDN-SSD being updated. WFP will support cargo movement towards Sudan through Renk whether trough Logistics Cluster services or On Demand Services (former Bilateral Service Provision)
- Metema - Galabat: some ongoing on movement through this border. The challenge remains on the customs clearances of the Sudan side. Seems that MI, GIS and HAC clearances from Port Sudan are required however post crossing, organisation will share information.

Previous updates – no changes are included in light grey

Information represented in this document is based on the most accurate data currently available from the Field Logistics Cluster staff supporting the emergency response operation. It may be revised or updated as new or more complete data becomes available.

Ali Awan — *Sudan Logistics Cluster Coordinator* — ali.awan@wfp.org
Sudan Logistics Response — Sdn.response.logcoordination@wfp.org

Logistics Cluster: Jeddah - Port Sudan transport service

- Ad hoc services out of Jeddah have already begun.
- For the time being, services will be managed using regular commercial services.
- Transport will be arranged as requests come in from partners.
  - Current transportation is coming directly from the airport/seaport, and transported to Jeddah port on bonded vehicles. No traditional clearance in Jeddah, and no permanent storage facility in Jeddah.
  - Cargo will be transported in containers – Reefers are available.
- Requests will be evaluated on a case-by-case basis. Limitations of regular commercial cargo persist.
- Requests must come with accurate information! Because this is ad hoc, we must have accurate information.
