MYANMAR LOGISTICS CLUSTER SNAPSHOT

Logistics Cluster Common Transport Service – Road and Waterways

The Logistics Cluster in Myanmar is offering 5 types of services to UN agencies, INGOs and International organizations:

1. Air Cargo facilitation
2. Temporary storage facilities
3. Common transport services
4. Logistics Hub s
5. Logistics Information management

Common Transport Services are provided by the Logistics Cluster in order to maximize capacity and efficiently respond to the needs of partners in the field. The Cluster has contracted a fleet of trucks, barges and boats for inter agency use and implemented a system for supply tracking.

ROAD TRANSPORT:

A fleet of 15 trucks is currently available to deliver relief assistance into the Delta, based at the inter agency warehouse set up by the cluster.

The **fleet** consists of:
3 trucks of 14 feet capacity
6 trucks of 22 feet capacity
6 trucks of 32 feet capacity
More can be contracted on a day-to-day basis should additional capacity be required.

As per the SOPs presented and made available to the cluster partners on the Logistic Cluster web page, the use of cluster transport assets is organized through the Cargo Movement Request (CMR) system. Cargo will be moved based on the submission of CMRs and according to the priorities established by the IASC CT. CMR forms are available on the Logistics Cluster website at www.logcluster.org/mm08a.

For all transport services please submit your request to: myanmar.cargo@unjlc.org

(Loading operations at the Yangon jetty 2008)

RIVER TRANSPORT:

To increase capacity and bypass any difficulties arising from deteriorating road conditions in the Delta over the rainy season, the logistics cluster has also leased a fleet of barges and boats to deliver relief assistance via waterways. The majority of all cargo movement within Myanmar is now by these means.

(Logistics Cluster barge, Yangon jetty)

The **fleet** consists of:

Barges	1x 500 tons 1x 650 tons 1x 800 tons (plus 4 barge pushers) **Total Capacity 1,950 tons**
Boats	2 x 300 tons 1x 350 tons 1x 600 tons **Total Capacity 1,550 tons**
Jetty	2 jetties established in Yangon

Like all common transport services, the use of barges and boats is organized through the CMR system.

The Logistics Cluster focal point for road and sea transport is: hien.adjemian@wfp.org.
